

Premium Hoisting and Pulling Solutions

ROTZLER is an international leading manufacturer of hydraulic winches and winch systems for lifting and pulling loads.

Together with renowned body builders we develop first class winch solutions for the use in various applications. These include recovery and rescue vehicles, cranes, marine cranes, drilling equipment and military vehicles.

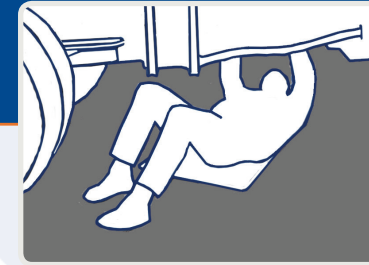

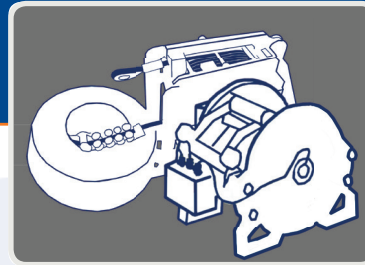

ROTZLER offers customized solutions from a single source. Our products range is available from high-quality standard winches on individual systems solutions to comprehensive services.

We thereby meet the highest safety standards and offer products up to the technical level. Their compact and modular design allows an individual integration in different vehicles. On request, we provide our customers the winch installation into the vehicle.

More than 150 qualified and motivated employees are located at our headquarters in Steinen, Germany. In addition, you will find ROTZLER in the regional locations in Canada, South Korea, India and the US.

ROTZLER - The experts for winches and winch systems.

Winches and Winch systems

ROTZLER winches and winch systems meet the highest standards of quality and safety.

- High-quality products manufactured to the latest technical level and according to the highest safety standards
- Product series TITAN (hoisting winches) and TREIBMATIC (pulling winches) are used in international markets
- Compact winch design allows individual integration in different vehicles and applications

Winch integration

ROTZLER takes over the customer-specific winch installation in the vehicle.

- Planning and design of the matching winch solution for individual requirements
- In close cooperation with our customers tailor-made wind systems are implemented
- Perfect integration in the vehicles by our professional construction team in Steinen or directly at our customers

Customer Service

The ROTZLER Customer Support provides our Clients a complete service firsthand.

- Additional services for the entire range of products, for the individual winch or for completely integrated winch systems in vehicles
- Professional advice of our customers from the planning through the completion of the project
- Our service range comprises user-specific seminars, training, repair and spare parts service
